SIGLENT Technologies exhibits at 2019 Dayton Hamvention Show

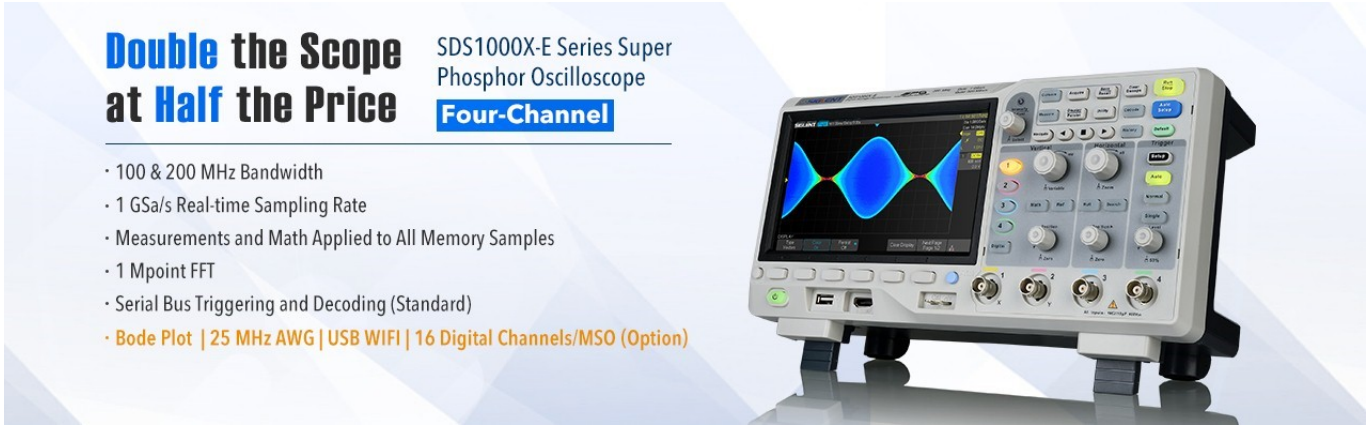
June 06, 2019

The 2019 Dayton Hamvention Show took place on May 17 – 19 at the Greene County Fair Ground, Xenia, USA. SIGLENT Applications Marketing Manager Jason Chonko, Application Engineer Scott and GM Steve Barfield displayed and sold several popular Siglent models of equipment at the Siglent booth.

The show is the largest showcase for radio amateur equipment and supplies in the USA. It is the sixth year for SIGLENT to attend Hamvention. This year there were more than 25,000 attendees at the convention, which meant the SIGLENT team was extremely busy introducing and selling equipment at the show.

SIGLENT showcased products including the SSA3000X series spectrum analyzer, SDS1000X-E series digital oscilloscopes, SDM3055 Digits Dual-Display Digital Multimeters and other advanced models.

The SDS1000X-E series digital oscilloscopes turned out to be the most popular at the show. This family of scopes is available in 100 and 200 MHz bandwidths and 2 or 4 analog channels and come with a maximum sample rate of 1 GSa/s and a standard record length of 14 MPts. The X-E' series employs a new generation of SPO technology that provides excellent signal fidelity and performance.



Another popular product is the SDM3055 Digits Dual-Display Digital Multimeter. It is a digital multimeter designed with 5 ½ digits reading resolution and dual-displays, especially suited to the needs of high-precision, multifunction and automatic measurement.

We wish to thank everyone who came by our booth and we look forward to seeing you again next year!
